

My Little Bookstore

Team Traders

JongSun Park, Daye Eun,
DongHun Kim, Hyeon Joon Lee

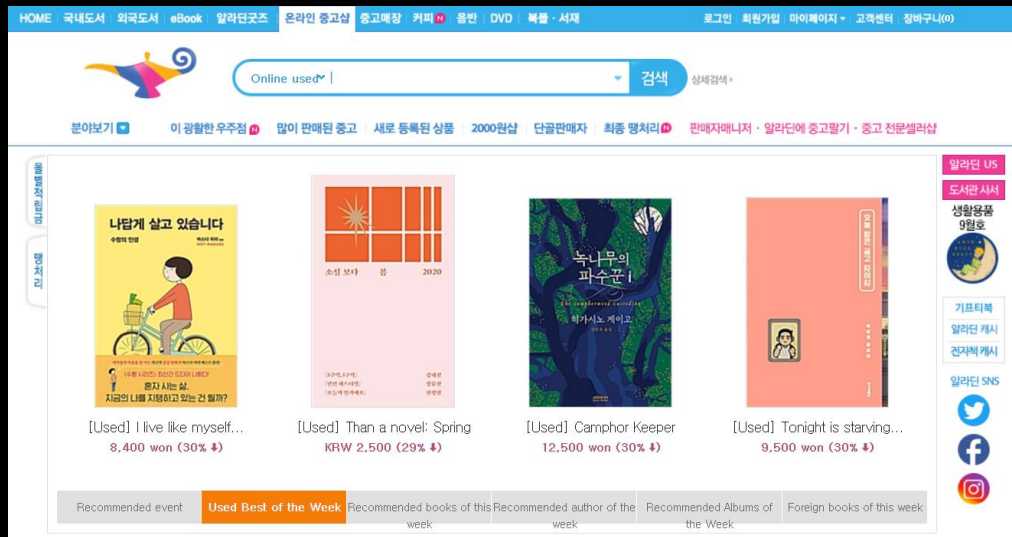

Problem

- Book lovers tend to buy a lot of books
- Sometimes, books we buy do not always turn out as we thought they would – Don't judge a book by its cover (Literally)
- The book is taking space and collecting dust
- Trashing them out be the least desired option
- Giving it to someone would be nice, but who should I give it to?

Possible Options

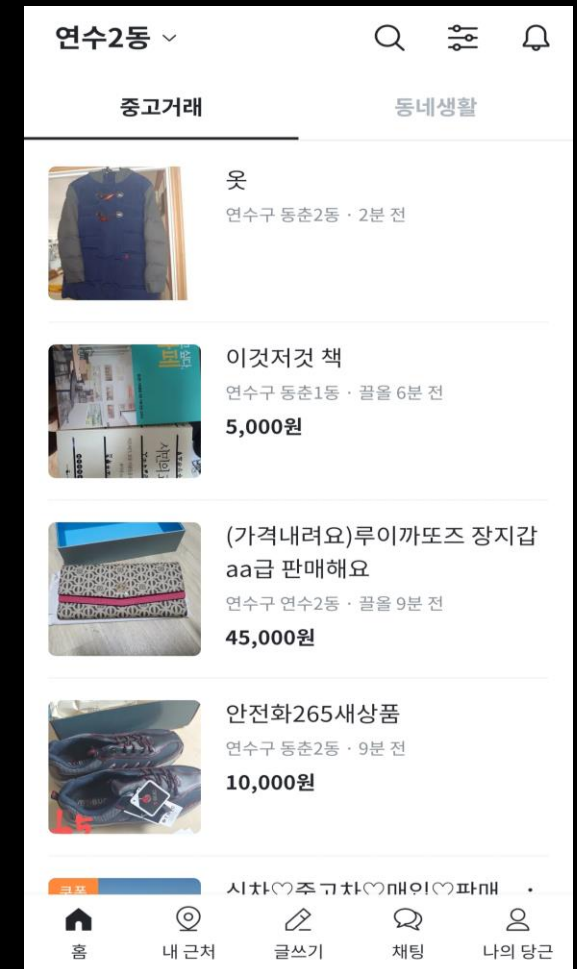

- Aladin Second-Hand Bookstore

- Some books are not accepted
- Only get a small amount of money

- Daangn Market

- Too general for book selling / buying

Solution

My Little Bookstore

A web application that aims to create a community by uploading the books for sale and handing them over in person.

Serves as a place to find people who want to give or get the book

Lets the user list all the books they would like to give to others with the price they are willing to sell for

Users can view others' bookstores and decide whether they want the book or not, based on the price and reviews provided by others

My Little Bookstore

Easy to use: sets a very low entry barrier since most people are already familiar with selling platforms

Specialized for Books: shows and supports relevant information about books and provides useful functions

Generalized for all book genres: accommodates users with diverse fields of interest

Responsive Web Design: runs on any device that supports web browsing

No online payment system: financial transactions not supported

Main Functionalities

Provided to Sellers & Buyers

- Browse all books
- View recommended books
- Rate books
- Read/Write reviews about a book
- Write a discussion about a book

Provided to Sellers

- Add/Delete books from the bookstore
- Edit book information

Provided to Buyers

- Buy books
