1. Group Progress Update
* Project Milestone4
- Deploying the application through Heroku (Done)
    - Fixed the issue with Heroku deployment. The database is now connected and running on the server. Deployment can now be done in one-click through Heroku or will automatically be deployed when we commit to the master branch.
- Frontend - Edit Book Information (Partially Done):
    - GraphQL queries are added to the frontend code, but the Edit book is not fully functioning.
- Frontend - Book Review Model (Partially Done):
    - GraphQL queries are added for AddReview and working. But fetch queries are not fully functional at this point.
- Frontend & Backend - Implement Book Rating (Partially Done)
    - Allowing users to rate a book is currently in progress and will be finished soon.
    - Currently facing a challenge in computing an average of rating.
- Frontend - Create a 'Bookstore' page (Partially Done)
    - Allowing users to view others' bookstores.
    - This differs from 'MyBookstore page' as it contains 'uploaded book history' and 'user's information'.
- Frontend - Create and connect links to the others' Bookstore, and 'Individual Book Page'. (Partially Done for 'Individual Book Page')
- Frontend & Backend - Browsing (Partially Done)
    - Allowing users to search books and sort the results by categories: date, rating, etc..
- Frontend & Backend - Chatting (In Progress)
    - Due to a low priority, the implementation of the chatting system has been delayed until the finalization of the above functionalities.

Our progress is still behind schedule, mainly because all of us had to put figuring out deployment as a top priority. Since there were possibilities with Heroku not working well for our project, some of us had to work on AWS as a backup. We managed to fix the issue on Heroku but due to this, our team is behind schedule. Now we can focus on working on the remaining tasks and making sure all functionalities are working. We had to move some tasks to the final release.

2. Updated schedule
The updated schedule is available on Trello.
